

Our top priority when holding the event is to prevent the spread of COVID-19.

We will make absolutely sure that full-fledged COVID-19 measures are in place, to ensure that everyone can safely visit the event in line with a new style of life.

The Japanese government's Basic Policies for Novel Coronavirus Disease Control and the Novel Coronavirus Expert Meeting's Analysis and Recommendations of the Response to COVID-19 require the implementation of infectious disease prevention guidelines prepared for each industry. The event is in strict compliance with museum guidelines to prevent the spread of COVID-19 as set forth on May 14, 2020 by the Japanese Association of Museums and the exhibition industry guidelines to prevent the spread of COVID-19 as revised on August 21, 2020 by the Japan Exhibition Association. We will thoroughly execute measures to prevent the spread of COVID-19 among visitors, exhibitors and contractors, and will plan, prepare and hold the event using a well-prepared system.

(Example of measures)

**Measure 1: Prevention measures for admitting people suspected of infection**

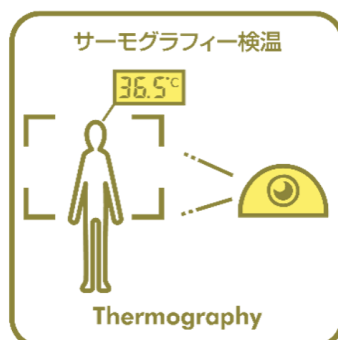

- At the time of reservation, thoroughly call attention to the fact that individuals that do not comply with guidelines will be refused admission.
- Install a thermography camera to check visitor's temperatures prior to their lining up for admission.
- Disinfect equipment and facilities that visitors and others may come in contact with.

**Measure 2: 3C measures by restricting admission based on time slots and thoroughly ventilating the event hall**

- Limit the number of visitors admitted by spacing admission times. Fully manage guidance when there is a risk of it being crowded.
- Regularly open windows and doors in the event hall that can be left open and use a blower or other type of fan for ventilation.

**Measure 3: Tracking measures by implementing a reservation-only system**

- Confirm name, telephone number and email address at time of reservation.
- Establish a tracking system using the COVID-19 Contact-Confirming Application (COCOA) and the like tool
- Other construction and preparations
- Design the layout so that it prevent visitors and exhibitors from clustering together.
- Implement full-fledged infection disease prevention measures for all workers, including taking workers' temperatures, wearing masks and disinfection.

Measures planned to be taken against COVID-19 at the artKYOTO2020 venue
